

Introducing the Ealing Procurement Framework (epf)

Introduction

Matrix Milestone is proud to introduce the Ealing Procurement Framework (epf) – a multi-specialism, Neutral Vendor framework created in partnership with Ealing Council.

As Ealing's official delivery partner, we've applied our extensive knowledge of the public sector to help create a framework that provides public sector organisations with a streamlined and OJEU compliant route to market for Services, Works and Goods. The epf also supports social value and helps organisations realise significant savings through the Matrix platform and our marketplace of accredited suppliers.

Ultimately, this will enable public sector organisations to benefit from more transparency, visibility and control across the entire Procure to pay (P2P) process.

In this guide, we run through:

- The challenges in the market the epf will help you address
- Our Matrix Milestone solution
- How you can access the Matrix Milestone via epf
- The categories of spend we cover

Benefits of the epf

Accessing the epf and engaging the Matrix Milestone solution provides a range of commercial and non-commercial benefits supported by a host of added value services:

- Comprehensive rate and project benchmarking support
- Supplier selection advice from a comprehensive range of pre-approved, accredited suppliers
- Easy and intuitive processes for creating briefs and Statements of Requirement
- Feature rich, real-time Management Information and Business Intelligence that will provide the data to continually improve the efficiency of your procurement strategy
- Compliance to IR35 with projects and engagements checked continuously end to end
- Support with Evaluation and Moderation process of competition procurements

Chris Bryant,

Head of Business Engagement for
Matrix Milestone

The key challenges the epf addresses

The public sector is currently under pressure to deliver like never before. The government's Build Back Better strategy has set out plans to invest in infrastructure, pursue growth, drive social value and transition to carbon net zero.

The crux of the challenge is to deliver effective transformation programmes that will generate efficiencies and savings for the public purse. At the same time, all this must be achieved on tight timescales and with reduced budgets. Being able to source the right organisations and service providers to help facilitate and manage transformative projects, with optimum value, is key to achieving these goals.

The problem is that many public sector organisations still struggle to implement consistent, well-managed processes for buying and managing the services needed to deliver complex projects quickly and at scale.

This results in:

Lack of control

With no clear process for ensuring that projects are outcome-focused, or with clear criteria for payment.

Lack of transparency

With a limited understanding of which suppliers are working on which projects, or whether they are compliant with new rules like IR35.

Poor visibility

With a lack of management information and business intelligence, meaning learnings and potential improvements in supplier engagement are often lost.

Limited or no cost savings

With limited access to or competition between suppliers, resulting in higher prices and poor performance on social value.

Our Solution

Statement of Work is emerging as the de facto approach that helps provide a solution to the procurement challenges that public sector organisations face.

A Statement of Work makes clear what work will be completed, and who is responsible for completing it either within your supply chain or internally. It also clearly outlines objectives, key project milestones and when payment is due in line with measurable project outcomes.

Statement of Work is an effective solution whether it is mandated by an organisation or is carried out ad hoc. However, for competition and cost reduction to be most effective, the process needs to be centrally managed, organised and controlled. It also requires access to a wide range of suppliers.

Matrix Milestone: a managed marketplace approach – now available via the epf

We provide a market-leading solution for procuring Statement of Work services with Matrix Milestone. It is a marketplace where public sector organisations can access a dynamic supply chain of organisations and service providers who

are primed to deliver the services required in line with pre-agreed, measurable targets. Our approach is focused on outcomes and deliverables, so you only ever pay for services which get delivered.

All the suppliers in our network are accredited and pre-approved in line with public tendering regulations. This continuously evolving supplier community ranges from nationally and internationally renowned companies through to smaller businesses that support the localisation agenda. These include SME, start-up, micro-businesses and social enterprise suppliers that deliver against the robust demands of the newly revised Social Value Act. As a Neutral Vendor, we are committed to delivering optimum value through competition within this community.

We are also continually expanding our supply chain and have a streamlined process for onboarding suppliers. This ensures we are always able to meet new emerging and local geographic needs. If you are a new customer, we can also onboard your existing suppliers, with around 97% joining the Matrix Milestone supplier community.

Our approach also provides you with the option to engage with our marketplace on different levels. You can choose a fully automated solution with low touch support from our team of procurement specialists, or a high touch solution where we add value at every stage of the process.

Our full service includes:

Specification development

We work with you to develop and create the brief and Statement of Requirement, ensuring that it's in line with best practice, encourages good tender responses, delivers results against agreed expectations, and clearly defines the milestones and outcomes that the project will be delivered against.

Supplier identification

We use our expert knowledge to help you review and identify a shortlist of potential suppliers – identifying and onboarding new suppliers as needed.

Tender process management

We support you throughout the end-to-end tender process with our team of procurement specialists available to assist at evaluation or moderation stages if required.

Contract award and work order creation

We work with you to create a complete and robust Statement of Work ensuring that it is developed around outcomes, milestones and value.

Project review and evaluation

We also help you review and evaluate your project when it has been completed – making sure learnings from your engagement are captured to help improve outcomes and cost benefits in future projects.

How we work

Review of project
specification

Statement of
Requirement created
including outcomes
& milestones

Supplier review and
engagement

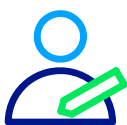

Project delivery

Contract award &
SoW created

Project release,
proposal submission
and evaluation

Reporting available
across the end-to-end
process

Self bill, invoicing
and payment

Complete Project

The Matrix Milestone difference

Key to our solution is the Matrix Milestone technology platform – an intuitive system that automates the entire source to pay process and facilitates contract and project management overviews on every project.

Our dashboard provides at a glance reporting detailing an overview of the status of every project and supplier. Powerful, feature-rich, real-time management information and business intelligence reporting tools are also integrated as standard.

We understand that technology won't guarantee success on its own though. We are a service-led business, enabled by technology, fully set up to provide you with a range of value-added services designed to give you full support through the entire source to pay process. Our goal is to ensure that projects are always outcome-based and delivered successfully and on budget.

Our people are critical to making this happen. We provide access to suppliers across 27 categories and 360 sub-categories that cover the full range of specialist professional services and consultancy spend. Managing this breadth of spend requires extensive knowledge, so we have built a dedicated team of experienced procurement category experts, covering every category of spend, that are ready to support you whatever level of service you need.

Through extensive engagements, we have proved that this approach delivers:

- Direct awards within 24-48 hours and the capability to raise and release mini-competitions within 14 days
- Elimination of payment for non-delivered activity
- Savings of between 10-20% per project

Our approach also enables us to provide you with a fully rounded service, delivered by our procurement experts, that includes:

- Specification development and supplier selection
- Mitigation of scope and budget creep
- Project delivery across all categories of spend, project size, scope and complexity
- Rate and project benchmarking support
- Evaluation and moderation processes for competition procurements
- Plus full end to end contract management

How to access Matrix Milestone through epf

Stage 1

Decision to utilise the epf
as a route to market

Stage 2

epf Call Off / Access
Agreement completed

Stage 3

Matrix Milestone / Client
project team established for
implementation (24/48 hours for
“MM Lite” and 4-6 weeks for full
scale implementation)

Stage 4

Go Live – access to the
platform, team support
and accredited supplier
community

What's your project?

Whatever your need, our extensive supply chain and
comprehensive knowledge of all categories of spend ensures
that you will be able to find the right supplier for your project.
